

NISSAN SILVIA

Supreme Expression of Power and Beauty

The elegant Nissan Silvia Turbo ZX introduces the driver to a unique blend of beauty and power.

With a top speed of 125 mph and an exhilarating 0-60 in under 8 seconds, the Silvia Turbo ZX provides dramatic performance to complement its classical styling. Power comes from Nissan's acclaimed 1.8 litre engine, with a turbocharger and ECCS management facility and fuel-injection, to produce a formidable 135 bhp. The turbocharger starts to boost power from just over 1000 rpm and is delightfully smooth in operation.

The new Silvia Turbo ZX pampers the driver with an even more luxurious and fashionable interior, complete with air conditioning, tilt/detachable glass sunroof, colour keyed front spoiler and rear apron and new high quality seat upholstery.

Nissan's designers determined that the Silvia Turbo ZX would have an interior as attractive as the exterior, and the result is a strikingly plush and roomy cabin with seats upholstered in fashionable velour material, with carefully matched door trim. The front seats are adjustable for reach and rake, while to ensure maximum comfort, the driver's seat has adjustable lumbar support. A slick-change five-speed gearbox helps the keen driver achieve maximum performance, and yet gives the Silvia Turbo ZX competitive fuel economy figures. There is also the option of a four-speed automatic transmission with lock-up torque converter.

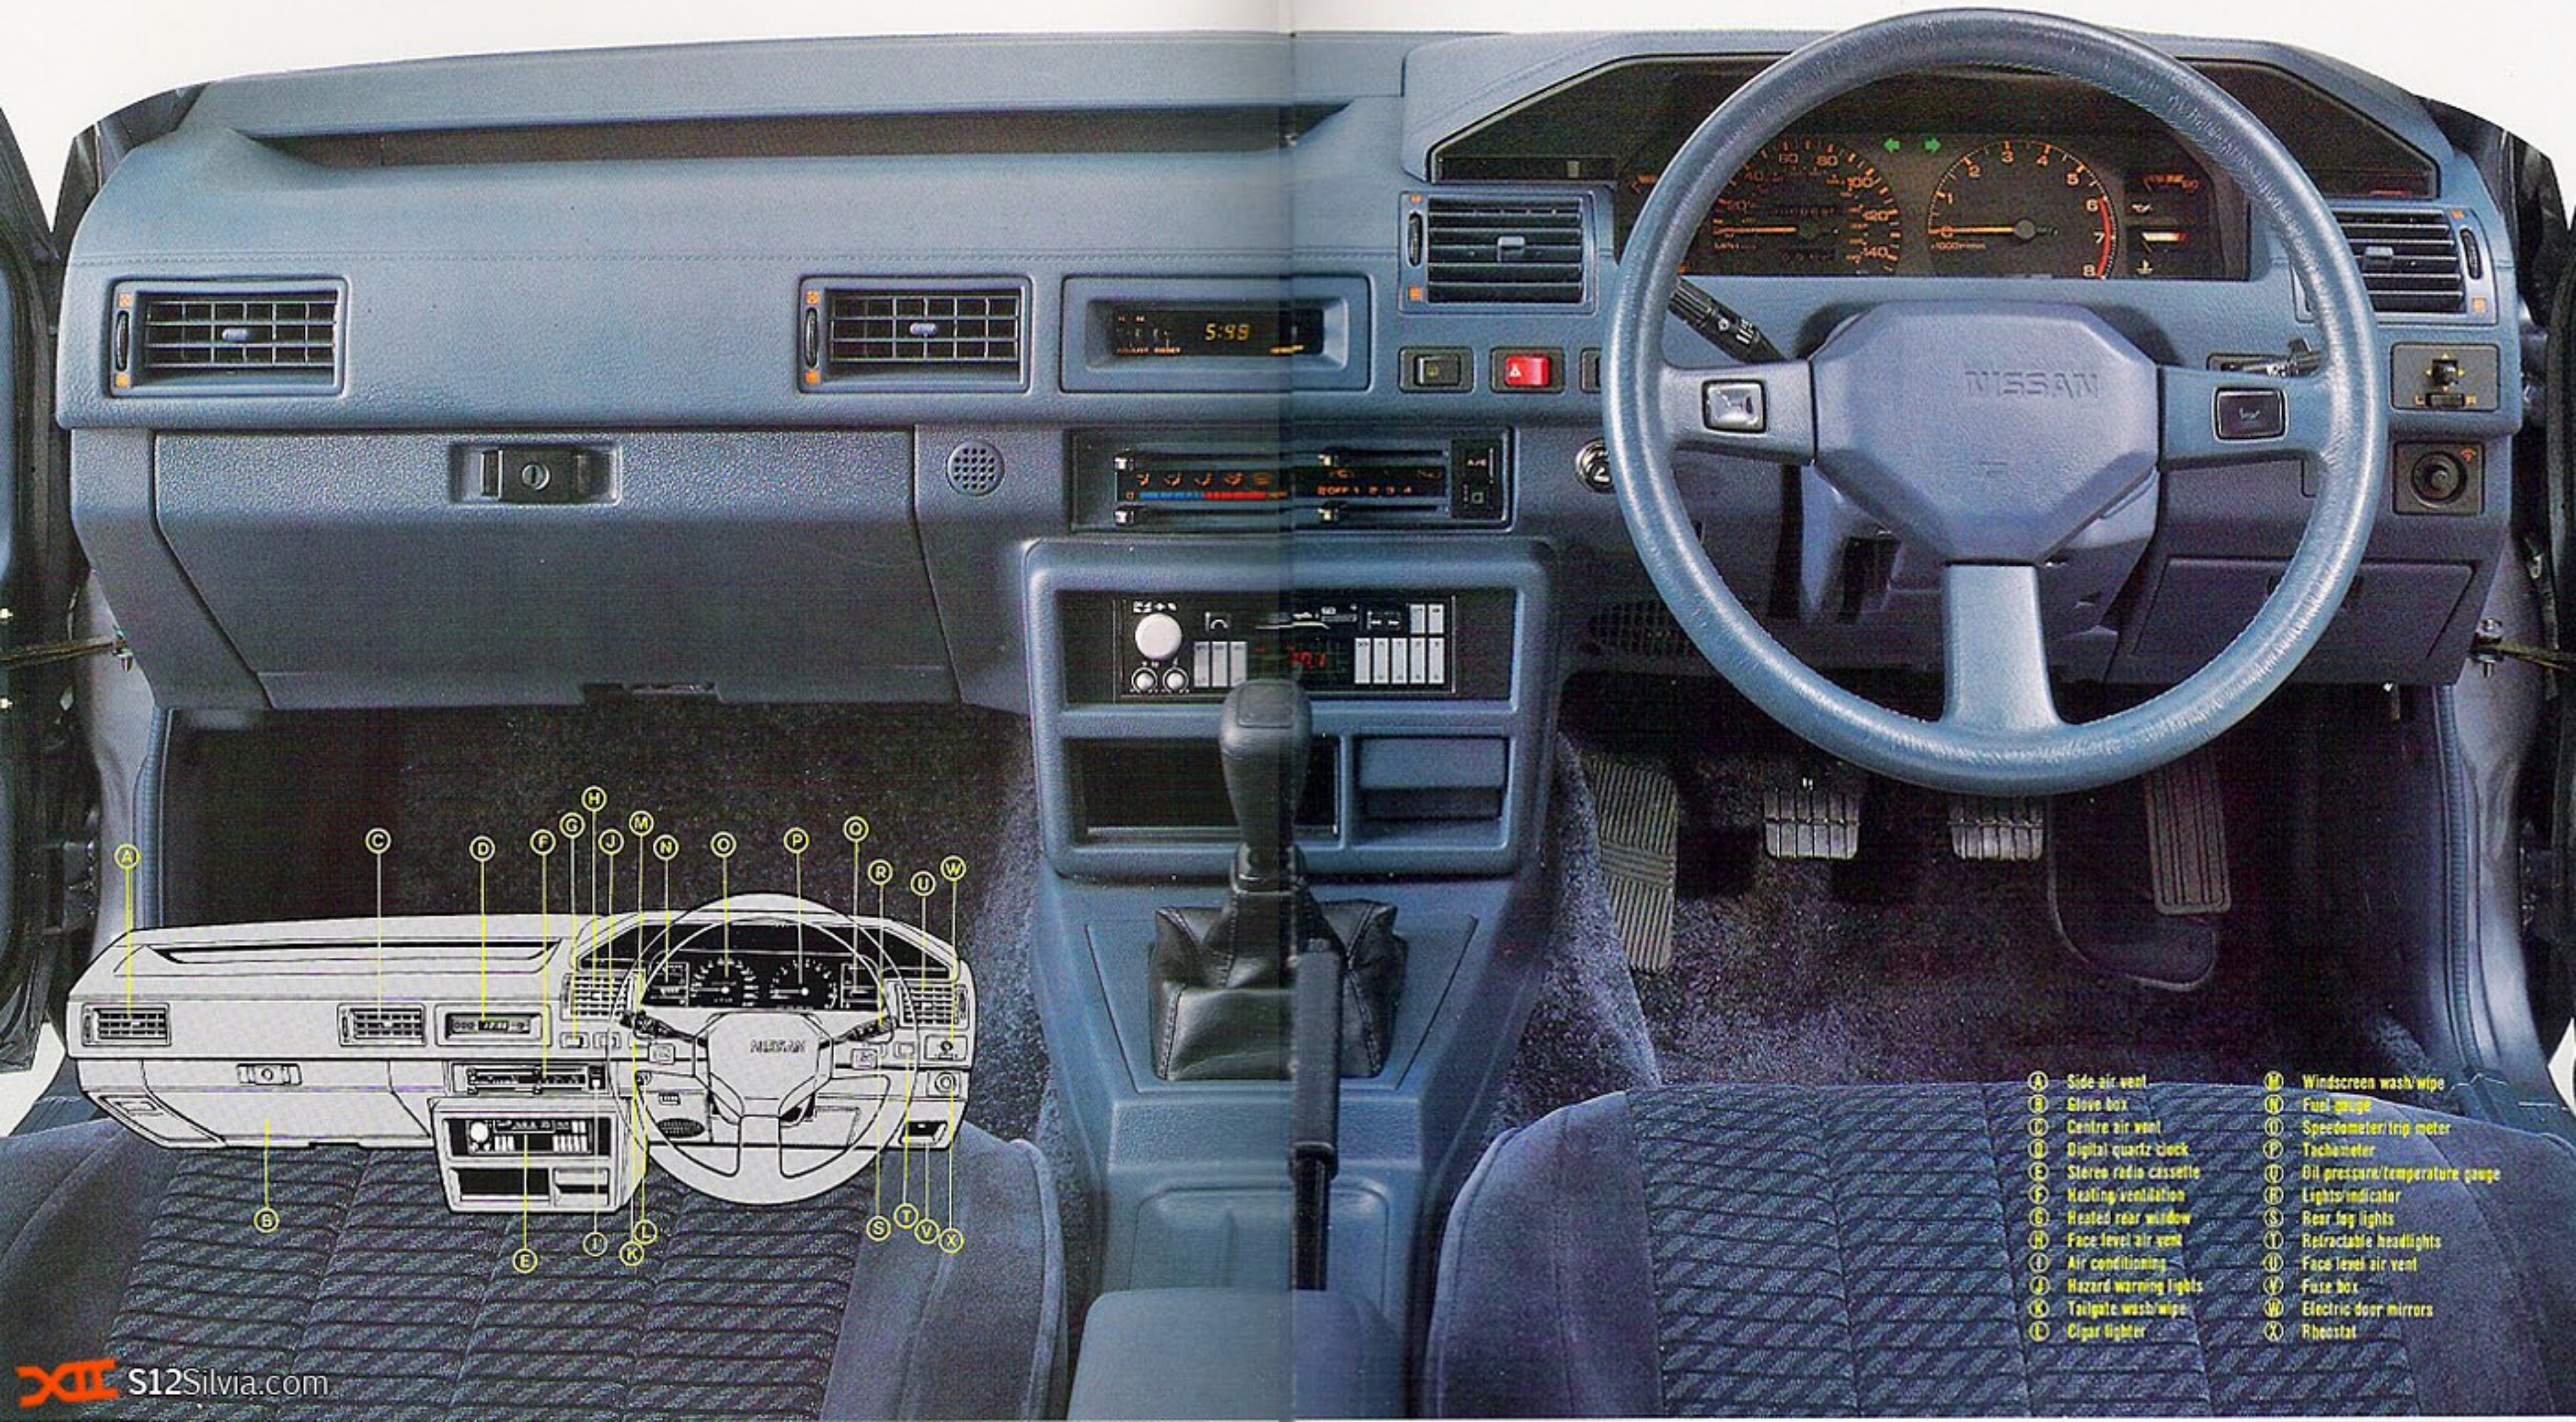

The Silvia Turbo ZX follows in the Nissan tradition of providing lavish equipment levels. New features include air conditioning, and a sunroof which can be tilted to let in a controlled amount of air or completely detached from the car allowing occupants to enjoy open air motoring. Once removed, the sunroof can be stored in its protective cover, in the luggage area.

Variable ratio power assisted steering, electric windows and door mirrors, quartz digital clock, lockable glovebox and 'lights on' warning are all

fitted as standard. Both the fuel flap and the tailgate have remote releases.

High quality in car entertainment is provided by a three-waveband stereo radio with electronic station-seeking facility and an auto-reverse cassette system, mated to four speakers.

Comprehensive instrumentation includes turbo boost meter, oil pressure gauge, trip recorder and tachometer, and there's an instrument panel rheostat.

- | | |
|-------------------------|----------------------------------|
| A Side air vent | M Windscreen wash/wipe |
| B Glove box | N Fuel gauge |
| C Centre air vent | O Speedometer/trip meter |
| D Digital quartz clock | P Tachometer |
| E Stereo radio cassette | Q Oil pressure/temperature gauge |

| H Face level air vent | T Retractable headlights |
| I Air conditioning | U Face level air vent |
| J Hazard warning lights | V Fuse box |
| K Tailgate wash/wipe | W Electric door mirrors |
| L Cigar lighter | X Rheostat |

The Silvia Turbo ZX's distinctive exterior styling has been enhanced by colour keying the front spoiler, rear apron and the mudguards. The wide bodyside moulding is integrated with the bumpers for sporty styling while the horizontal type radiator grille and power bulge on the bonnet give this ZX a sharp profile. Bronze tinted windows with a graduated upper shade and alloy wheels and retractable headlamps are also all part of this exceptional package.

GOSFORTH PARK

Excellent handling and roadholding is guaranteed, as the Silvia Turbo ZX has independent suspension with coil springs and struts at the front and semi-trailing arms at the rear. Front and rear anti-roll bars are also fitted. Wide 195/60 low profile tyres, together with power assisted brakes all round and rack and pinion steering with variable ratio power assistance, ensure confidence-inspiring control in all road conditions.

Nissan Silvia — Equipped with Style

The dramatic 1988 Silvia Turbo ZX is an outstandingly attractive car which will appeal to the enthusiast with its unquestionable style and lavish levels of equipment. Standard features include a superb four speaker stereo/radio cassette system, air conditioning, electric windows, twin electric door mirrors, tilt/detachable glass sunroof, bronze tinted windows with graduated upper shade, alloy wheels and sporty front and rear spoilers.

Nissan's resources for research and development, and the company's reputation for incorporating the latest production techniques in its factories, are the envy of many other manufacturers. Extensive use of private test tracks where very high speeds can be maintained in perfect safety are a vital part of developing steering and suspension

of 125 mph and 0-60 in under 8 seconds. Nissan's patented ECCS engine management system ensures the correct mixture and timing settings under all circumstances. Servo-assisted disc brakes are fitted all round.

systems. The Silvia Turbo ZX has rack and pinion steering with variable ratio power assistance which is very light when parking yet gives superb

The widely acclaimed turbocharged and fuel injected 1809 cc engine produces 135 bhp for an impressive top speed

There's a choice of a sporty five-speed gearbox or a four-speed automatic transmission with lock-up torque converter.

road feel when you are on the move. All-independent suspension gives a combination of excellent handling and a smooth ride.

The Silvia Turbo ZX's aerodynamic styling is the result of stringent testing in Nissan's own wind tunnel, with the use of retractable headlamps contributing to the wind-cheating drag coefficient of just 0.34.
